

3 Courses

Foundations of IoT Systems and Industrial Automation

Design Thinking for Human-Centered IoT Solutions

Advanced IoT Systems Integration and Industrial Applications

Sep 13, 2026

Aryan Raikwar

has successfully completed the online Specialization

IoT Systems and Industrial Applications with Design Thinking

In this 3-course specialization, learners will dive into the world of IoT systems and their integration with Industrial Automation. This specialization also explores the design thinking process, emphasizing a user-centric approach through empathy, ideation, and prototyping. Lastly, learners will delve into cutting-edge advanced topics such as edge computing, analytics, security, and fusion of IoT with robotics and automation techniques.

LearnQuest's Instructor Network is comprised of professionals across hundreds of technology disciplines from around the world.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
